DETAILED ACTION

Election/Restrictions

1. Applicant's election of Invention of Group I, claims 1-22, in the reply filed on April 24, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claim 23 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Invention of Group II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 24, 2006.
3. Applicant's amendment to cancel claim 23 as being drawn to nonelected invention in response to this Office action is advised.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claim 15 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In this case, claim 15 recites "a computer usable medium" in line 1. The so called "computer usable medium" does not necessarily invoke "computer readable medium". Claim 15 is drawn to functional descriptive material NOT claimed as residing on a computer readable medium. MPEP 2106.IV.B.1(a) (Functional Descriptive Material) states:

Art Unit: 2624

“Data structures not claimed as embodied in a computer-readable medium are descriptive material per se and are not statutory because they are not capable of causing functional change in the computer.”

“Such claimed data structures do not define any structural or functional interrelationships between the data structure and other claimed aspects of the invention which permit the data structure’s functionality to be realized.”

Claim 15, while defining a computer readable program code, does not define a “computer-readable medium” and is thus non-statutory for that reasons. The claimed “computer usable medium” can range from paper on which the program is written, to a program simply contemplated and memorized by a person. The examiner suggests amending the claim to embody the program on “computer-readable medium” in order to make the claim statutory.

“In contrast, a claimed computer-readable medium encoded with the data structure defines structural and functional interrelationships between the data structure and the computer software and hardware components which permit the data structure’s functionality to be realized, and is thus statutory.” - MPEP 2106.IV.B.1(a)

Allowable Subject Matter

6. Claims 1-14 and 16-22 are allowed.
